

Vaibhav Lalwani

AI Systems Engineer | MSc Advanced Data Science & AI, University of Liverpool
Liverpool, UK | +44 7544 537 860 | vaibhavlalwani26969@gmail.com | Portfolio | GitHub | LinkedIn

Open to UK part-time AI/software roles and internships | Graduate roles from January 2027

PROFILE

AI systems engineer building production LLM applications, retrieval pipelines and agent products end to end. Work spans evaluation, model orchestration, APIs, data, deployment and evidence-first interfaces. Shipped 20+ AI applications across product, academic and client contexts.

SKILLS

AI systems	RAG, LLM evaluation, agents and tools, structured outputs, MCP, PyTorch, OpenAI, Anthropic, Gemini, Groq
Engineering	Python, TypeScript, JavaScript, FastAPI, Node.js, React, Next.js, REST APIs
Data & ship	Postgres, pgvector, Supabase, Redis, BullMQ, HydraDB, Docker, Vercel, GCP Cloud Run, GitHub Actions

EXPERIENCE

AI Engineer, Full-Stack Meta Solution Technologies	Apr - May 2026
Remote, UK	
- Built features on Next.js 15, React 19 and TypeScript over a Python LLM backend with Postgres and pgvector. - Delivered structured-output flows, Supabase OAuth/magic-link authentication, BullMQ/Redis background jobs and 10-language i18n.	
Software Engineer Recruit Pilot	Jan - Apr 2026
Part-time, remote	
- Delivered React and TypeScript product features and fixes against a live REST API within a weekly review and release cadence.	
AI Engineer Independent	May 2024 - Jan 2026
Remote	
- Built LLM applications and autonomous agents across SaaS, research and operations; owned data, backend, interface, deployment and hand-off.	

SELECTED WORK

HydraSentry - HydraDB Build Blitz winner. Agent-memory integrity layer that checks provenance, blocks unsafe context and emits a signed review certificate. Source

QueueProof - HydraDB Connectors Hackathon winner. Cross-source retrieval workspace with claim-level citations and inspectable evidence across connected work sources. Source

Qyntra - Wikithon 2026 finalist. Personal knowledge system combining grounded answers with a navigable 3D relationship map. Source

RESEARCH & EDUCATION

NEXUS (2026), corrected v2 position paper on on-controller transformer inference and speculative edge execution; architecture and analytical model, without prototype or gameplay-corpus results. Corrected v2	
University of Liverpool	Jan 2026 - Jan 2027
MSc Advanced Data Science & Artificial Intelligence	
Christ University, Bengaluru	2022 - 2025
Bachelor of Computer Applications
